PROFILE

I'm a web developer with a flair for creating and recreating web elegance to suit my clients' needs in the shortest time possible. I am well vested and knowledgeable in HTML as well as JavaScript but am however passionate more on Software Architecture and Cloud Computing been a regular attendee of Web developer Meetups.

My experience and skills, not limited to to business development, project management, managerial economics, business information technology and corporate governance.

I have excellent analytical, and people's skills am also overly dedicated, zealous and full of energy having worked under self-set targets with a big passion in bettering my skills, facilitate my business Acumen and earn points in this ever-changing corporate world, which is transitioning digitally, and I hope to lead the old world into the new industry.

ACHIEVEMENT

Dynamic IT Business Analyst with extensive experience in driving operational efficiency and system performance across diverse industries. Proven success in implementing data analytics platforms, managing cross-functional teams, and identifying automation opportunities, resulting in significant productivity gains and cost reductions. With a knack for aligning IT initiatives with business goals, I am eager to leverage my expertise to drive innovation and growth in my next role.

WORK EXPERIENCE

FREE STYLE- Mantra Thrive for Good

I help advice on website development in various capacities as a student in the craft to horn my skills, right now am trying to make an open-source platform, like a thrive institute share for share an online training program which will link different business aspects producers and consumers per say and a salesforce platform for monitoring and evaluation of data and its algorithms whereby I:

1. Orchestrated the successful migration of company data to a new cloud-based system, reducing data retrieval time by 35% and improving data security measures.

2. Collaborated with stakeholders to define business requirements for a major software upgrade, ensuring 100% alignment with business goals and leading to a 30% increase in system performance.
3. Developed and implemented a new IT project management methodology, resulting in a 20% increase in project delivery speed and a 15% decrease in project costs.

Current serving

PROPRIETOR MWENDE FASHION HOUSE.

This was my part time initiative where I try to empower the girl child by offering make up solutions to them at a friendlier price, this is just to make the Girl-child feel good and appreciated, this was a small pilot test conducted in and around JKUAT Juja Campus, the idea and its origin was all about girls feeling some type of way and being **conscious about their self with the competition that comes because we are built different**. Whereby some of our major achievements was

1. Develop project-specific financial models and tools to help projects run more smoothly.
2. Estimate costs and develop strategies to trim client budgets by 10% on average.
3. Provide business consulting services to upcoming girl-child founded businesses.

Current serving

ATTACHMENT INVESCO ASSURANCE

Situated AT Westlands, where we transferred data from their raw data (files, trad, traditional pen paper) to automated system where we transferred data into bits for easier access and faster way for filing saving up on space, paperwork and man hours. Cost effectiveness really and also and not limited to:

1. Working closely with the INVESCO assurance team to implement IT solution and system, e.g., CRM software, data warehouse, resulting in improved data management, streamlined processes.
2. Managing software implementation utilizing methodology to achieve budget adherence
3. Championed process and system improvement, e.g., automation of manual tasks, introduction of data analytics, leading to quantifiable benefit, e.g., 20% efficiency increase, improved decision-making].
